

Manufacturing periods

YOU CAN HAVE YOUR OWN STOCK OF BASMAT PROFILES

Suitable for clients that want to provide an immediate service

You can have your own stock of Basmat profiles and prepare a made to measure mat in **minutes**. You only need to have a saw for aluminium. Thanks to this option, dozens of clients **worldwide** take advantage of the Basmat patented click system. Basmat can advise you about the most suitable **stock** for your area. This is a good option for customers in **distant** locations or countries with transport difficulties. You can have a safety stock with the best seller references and use the **standard** or **express** services for momentary cases.

EXPRESS SERVICE

Urgent made to measure mats

Basmat is aware of the **urgencies** related to the installation of its products. Often, the mat is the last element to be installed in a building work, and it becomes, moreover, **essential** at the moment of the **opening**. That is why Basmat offers to its **regular clients** the Express service, reducing the manufacturing period to 24 hours. Please consult the conditions for this service.

(*) The period of 24 hours is the manufacturing period starting from the confirmation of the order.

STANDARD SERVICE

Made to measure mats

Basmat has **reduced** to the minimum the manufacturing period for better responding to the demands of the clients.

You can also use this service as an **added feature** to the purchase of Basmat bars by bulk. This way, it is not necessary to have a big **stock** of models, finishes and colours.
